DELTA REGIONAL MEDICAL CENTER

The American Health Care and Delta Regional Medical Center prescription drug list or PDL (a) names the most commonly prescribed medications for your pharmacy benefit plan, (b) is not all-inclusive and does not guarantee coverage, and (c) is updated quarterly by the American Health Care pharmacy and therapeutics (P&T) committee, made up of practicing physicians and pharmacists.

Formulary revisions are based on objective evaluation of the efficacy, safety, and value of reviewed medications relative to other similar medications. American Health Care determines the PDL tier for medications that will best align the member's cost share with the value of the medication. Through evidence-based PDL management, affordability and accessibility of medications for customers and members can be improved.

Please check your benefit materials for specific drugs covered and copayment information for your pharmacy benefit program. More information is available through RxPortal™ at www.americanhealthcare.com. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate. Most generics can be obtained at the lowest copayment. For specific questions about your coverage, please call American Health Care at (800) 872-8276.

PA = prior authorization (pre-approval is required before this medication can be covered)

QL = quantity limits

ST = step therapy (a trial of a similar medication may be required before approval of this medication)

*The symbol * next to a brand drug indicates that a generic may be available.*
